NOTICE.

OUR GOODS

Are selected with great care and are of the best makes, and meritorious novelties will be, from time to time, added to our present line, our aim being to carry a complete stock of first-class Cabinet and Upholsterers' Hardware.

OUR PRICES,

Quality considered, speak for themselves, but are not guaranteed and are subject to fluctuations of the market without notice.

Gross or dozen prices apply to quantities of not less than one-half gross or one-half dozen only, as the case may be; smaller fractions will be charged at the advanced list named in catalogue. Other prices apply only to the quantities given.

Orders will be executed promptly at current rates, to the extent of our stock on hand, but such portions as may necessitate additional shipments are subject to prices ruling on date of invoice.

OUR TERMS

Are net cash, 30 days, except where parties are unknown to us, or are not rated in the commercial agencies, in which case they are positively C. O. D. *When goods are sent by express, C. O. D., collection charges will be added to bill*, an expense which can readily be avoided by sending money with order. C. O. D. orders must be confined to territory within a limited radius of New York, and under no consideration will goods be sent C. O. D. to Canada. Express companies will not accept C. O. D. packages on which the amount to be collected is less than \$1.00.

For one cent per ounce, or fraction thereof, parcels can be sent by mail to any part of the United States, but the weight of such packages must not exceed four pounds. Goods so sent are invariably at consignee's risk and at his expense for postage.

These Sockets are gotten up to use with French Casters, in the same manner as the Round and Square Rings are, the object being to supply a cheaper deep Socket Caster than those heretofore made, viz., those on page 16. These Sockets, both Round and Square, are perfectly uniform in size.

Square Sockets should be used with a larger Caster than round, making a better proportioned and much more durable Caster.

In addition to this Catalogue we also issue separate season Catalogues of Drawer Pulls and Fancy Cabinet Trimmings, Refrigerator and Bar Trimmings, and Cabinet Makers' and Mechanics' Tools, either of which will be sent upon application.

SCHOTT BROS.' FURNITURE BUTTON MACHINE.

234

HAMMACHER, SCHLEMMER & CO.

This machine has been on the market for a number of years, to the entire satisfaction of its many users. The price has recently been reduced, and is now within reach of all, even the smallest concern in the business; and although Buttons usually carried in stock by upholstery goods jobbing houses can be obtained at a lower figure than they could be produced by this machine, still, for making as required Buttons of the different fabrics to match coverings for special articles of upholstered furniture, which are ordinarily procured at considerable expense and loss of time, it is of incalculable value.

It does not require any skill or previous knowledge to operate this machine; anyone can easily work it, and in a few minutes produce a sufficient quantity of Buttons for a suit of furniture from the very material used in covering it, thus insuring an absolute match.

With ordinary care it will neither get out of order nor break, being very simple and strong in its construction, and we are prepared to guarantee every machine to work satisfactorily. If any part by some accident should break, it can always be replaced upon application.

Directions for operating it accompany each machine.

Complete, with one Die and two Cutters for 22 Line Buttons.....Each, \$4.00

Price does not include Shanks and Shells, which are extra; see next page.

In addition to this Catalogue we also issue separate season Catalogues of Drawer Pulls and Fancy Cabinet Trimmings, Refrigerator and Bar Trimmings, and Cabinet Makers' and Mechanics' Tools, either of which will be sent upon application.

NEW YORK.

CORRUGATED STEEL FASTENERS.

It is unnecessary to call the attention of the practical manufacturer and mechanic to the many uses to which this simple device can be put, as we believe its manifold advantages can be seen at a glance, while its low price commends it in numberless instances as a cheap and efficient substitute for glue, dowels, nails, screws, etc.
